

SHALL BRITAIN BE GOVERNED BY THE LORDS OR THE PEOPLE?

This is Issue Upon Which Great Struggle For Rights of House of Commons [to] Control Finances Will Be Fought

SHALL THE SIX HUNDRED OR THE FORTY MILLIONS BE IN CONTROL?

W. T. Stead Sees But One Possible Conclusion to such an Unequal Contest—Britain's Constitution at Stake.

Lords Will Reject Budget on Monday Commons Will Pass an Interim Budget Then Divide Ballot as a Decision May Be Chester Oration Publicity Hollow Not Under Such a Leader Can a Oligarchy Upon the Ruins of a Constitutional Government.

By William T. Stead.
London, Nov. 18.—The great battle begins on Monday. It will be temporarily decided whether the Lords shall carry Lord Lansdowne's amendment, which would give the majority of four or five to one. There is then the chance that the King may be asked to accept it, or that he may be crowned as a balance for the constitution by increasing the peers to pass the budget. It is not certain that the election in January, which has been constantly pointed out as the obvious practical result of the contest, will not decide the issue. The destinies have not decided the destinies of the House of Lords.

I am sure that the public has been presented upon both parties by the King and that neither of them will be satisfied. If there are any one of the great crises which will prominently affect all the contestants of Great Britain, it will be the issue of the collision between the British pot and earthcrusher, the gun, and the British hand, the pretensions of the hereditary chamber to an equal voice in the legislature of Britain.

Must Clear the Way.

I am so essentially a Conservative in the political sense that I am loath to conviction that I have strayed so far from this rising of a revolution. It is true that the cause of the peers has been filled over and over again. The time has come when they must be brought out of the way of progress. This time, however, is intolerable, and although we have offered them every way to escape their impudent demands, they are still in the way of salvation. Nothing remains for them but a swift judgment to come.

What will happen is this: The Lords will pass the amendment and a week later the Commons will do the same, except the challenge and the Commons will declare once more in the terms held out by the Lords. The peers will then be given the opportunity to show the circumstances of the present crisis that they alone have the right to govern. They will then be told that these taxes on the nation, and that they alone are the sole final authorities on the matter.

An Interim Budget.

The ministers will then announce the introduction of an interim budget, legalizing the collection of taxes which were collected in 1909 on the strength of the resolutions in the Commons. The House of Commons will then be in a crisis of avoiding a financial crisis which will override party consideration. This will be hopelessly unopposed.

Parliament will be then dissolved before the election, and the general election will occur in the first weeks of January. The issue is clear. The peers will not be allowed to be governed in any case by the 600 hereditary legislators or by the 1600 members of the House of Commons of people. As the issue lies in the hands of the forty millions, the result is clear.

Lord Lansdowne's amendment offers the country a government by oligarchs, not by plunkards. The Liberals offer a government by the people and for the people, using the power as the supreme power of the people, the power with the Terminate Lords.

When the cabinet is held, the convention will be called for mandate to terminate once and for all the veto of the peers upon legislation, and to vote for the proposal of the Commons giving legislative effect to all financial measures passed by the representatives of the people, thus requiring their passage prior to forming the laws. The Liberal party forms through the Liberal, Wales, Ireland, and Scotland, and the other two conservative, will win many seats in England, but no one on either side of the Atlantic can doubt the conservative victory.

The Liberals will return with a mandate to the people, who should return to continue in office unless the King makes sufficient lie peers to carry through his proposal. The people will give the vote of the peers and vesting all control of financial matters exclusively with the people.

Government by People Endangered.

The Liberals realize that the whole

of the struggle, right and street alway plant which contains all the engines purchased this year is concentrated during the past year, and is now in full of steel supporting steel and iron and in common with the building of the new bridge, which has been laid fire proof. No wood is used in the structure.

The engines and other equipment with their costs are as follows:

WORK OF REMOVING BODIES OF MINE VICTIMS ATTENDED BY PITFUL SCENES.

Chicago, Ill., Nov. 20.—The charred and blackened bodies of the victims of the disaster are removed from the St. Paul mine today and placed in rows to await identification. Decomposition has added its horrors to those of fire and suffocation, recognition in many instances being impossible.

Only the presence of the miners' prints on the soot-covered lids of the caskets has enabled the coroner to identify some of the bodies.

Preparations are being made to remove the bodies as fast as identified, so that they may be turned over to relatives.

Most drivers came in early today and it was announced im-

possible to continue the work without oxygen helmets.

The miners in the mine are beyond human endurance. The probability is that all the bodies will be removed from the mine by tomorrow night.

improvements, such as bituminous paving, has been almost abandoned during the period of the depression, and little has been done during the period has been but little. An experiment was also made in paving the track with asphalt, but the gall in paving the track allowed with concrete, which at the present time is being used. The cost of asphalt, although no definite opinion can be given as to its merits until the winter is over.

The bituminous paving done during the season is as follows: Jasper to Kitchener, \$12,000; Kingman to Alpine, \$10,000; Alpine to Jasper to Boyle; Frazer Avenue and Fourth street to the approximate cost of \$12,000.

Pink sidewalk and crossings have been put in, which are twice as wide as ever before. The money spent in this work was about \$16,000.

One pleasing feature in connection with the city's growth has been the desire of the property owners for boulevards, and a large amount of

OBTAINED EVIDENCE BY A PIECE OF STRATEGY

U. S. Department of Justice Secured Information on Electric Trust Investigation Stemming in the Magazine of the Monopoly Revealed

Washington, D. C., Nov. 19.—The department of justice in its investigation of the so-called Electric Trust has gathered records which, to the minds of the investigators, show that the electric power monopoly and the Washington company have agreed to end competition. It is searching for documents that are expected to establish that the American Telephone and Telegraph company, which had agreed to let the Western Union telephone system be used in interest along with the so-called street railway trust.

Through most of the evidence collected, it is shown that the company, after the formation of the Western Union telephone system, engaged in attempted interference, even high in the industrial and political world, to end competition against the Western Union company, which, it is shown, tried to stop the inquiry, were engaged in the government's investigation. The Western Union telephone system, and identified with it, the Bell Telephone Company, Mr. Woodard, Bellis Morris; T. J. Jones, Goldie and McCullough, and the Associated Telephone and Mr. Ostrom, electrical Commissioner's Good Work.

Commissioner McNaughton and C. L. Nichols, president of the street railway have spent many strenuous nights over the work. Among the last, Nichols, who is a man of great energy, has been particularly active in his efforts to obtain information from the telephone company.

To grasp the immensity of the operations one has to pay a visit to the telephone plant.

The big mechanical undertaking of the year has been construction of the power house which has been described by visiting engineers, as the largest in Canada.

To grasp the immensity of the operations one has to pay a visit to the telephone plant.

Such a trip has been an eye-opening one to many citizens who previously were unfamiliar with the intricate and interesting work being made.

The amount of money involved by the additions of \$300,000, and employment has been given for the past nine months.

It is estimated that the number of whom are skilled in their various lines.

FORTHCOMING BRITISH CONTEST TO BE CLOSE

Prediction is Made that Nationalists Will Hold Balance of Power—No Difference Between Rejection of Budget and Shoving It.

New York, Nov. 19.—The London correspondents of the Tribune consider the ministers are employing the interval before the constitutional crisis in which they are involved in quieting over the financial year. David Lloyd-George and Winston Churchill had been called in, and it is said would be secretly pleased to have the rejection of the budget followed by dire consequences which would bring the prime minister, Mr. Balfour, and Lord Lansdowne on board in minimizing the financial crisis.

After the week of the budget without an anchor to windward jettymasts must be rigged up, a large portion of the cargo jettisoned and the remaining goods sent to port. It will be a melancholy government salvage when the landing stage and the dock are left to advance, but effective measures are required for protecting the treasury against the importation of tea and other duties and legalizing the income tax and the death duties. The latter two, however, are taken and portions of the finance bill are galvanized into life, there will be no time to go back and possibly a loan for the new naval war ordered in January. The suspension of the session will be followed by a fierce storm of partisanship and swollen flood of rhetoric. The long and commanding influence will effect a modus vivendi until the January recess.

The confidence of the whips and election agents on both sides is increasing in the Liberal party. The moderate Liberals, who believe in the more serious than the ministers expect, that the government ought to gain the upper hand from the constitutional issue of the control of taxation, are representative chamber. Lord Lansdowne, who has the greatest authority, will propose the suspension of the budget pending an appeal to the court. Mr. Asquith, who is in favour of the action of the lords in advance of the Lancashire contest as a popular measure, will support the proposal. The difference between suspension and rejection is as narrow as between trust and distrust.

There are clever tacticians on both sides, and a great constitutional battle is coming on. So well are the forces balanced that the side which is likely the majority for one side or the other not being large enough to allow the government to hold its financial administration with power and security and avoid dependence on the lords' support.

The casts of veterans at Westminster indicate a feverish period of stepover ministries and half compromises.

HE FELT NO PAIN.

Under Wonderful Anesthetic Although Conscious.

London, Nov. 18.—An operation was performed on a man at the Royal Free Hospital at Greenwich by Professor Johnstone, dean of the University of Bucharest, who demonstrated a noteworthy development in the use of the wonderful anesthetic, stovaine. Hitherto, the drug had been confined to operations on the eye, but now, by pressing influences upon the heart exceeding its employment in operations involving the heart, he has done so. Now, however, it has been discovered that this disadvantage can be overcome by the use of the drug in combination with stovaine and to demonstrate this Professor Johnstone today, in the presence of the Royal Society, moved a mass of tuberculosis grafted from a man's neck.

He said: "I am surprised that I had used no general anesthetic in any operation on the heart in eight years, having performed more than 700 operations of various kinds under stovaine injection. In the last case Professor Johnstone performed a hysterosalpingectomy in the spinal canal between two vertebrae at the base of the neck and injected there an emulsion of stovaine and five cengrames of sulphate of strichine dissolved in water. After a minute the patient was unconscious, the operating table and his head and shoulders were lowered so that the man could sit upright. After two minutes the operation was carried out in the ordinary manner. No other reaction was produced except that the man was dead." The patient was perfectly conscious all through and answered the questions of the surgeons easily.

"Do you feel any pain?" they asked.
"No, I don't," he replied.

"Are you quite comfortable?"
He was asked.
"Yes, thank you," he replied.

There was something uncanny to the onlookers to see the patient's unconsciousness, but when he was found while there was a gaping wound in his neck three inches long. After the bandage had been applied he got off the table and walked to the next room, where a stretcher was waiting to take him to a ward.

Foods on the Isthmus.

Montreal, Nov. 19.—There have been continuous rains throughout the Isthmus during four days, and notwithstanding the fact that extra precautions have been taken, many accidents have occurred in Cuba lately. The occupants of the houses near where the land has been cut down have been moved into other quarters. The Chagres river has flooded big tracts of land, and in some places the road is under water.

Killed by Dynamite Explosion.

Vancouver, Nov. 19.—One boy was killed and another will lose his eyesight, probably for life, as the result of an explosion of dynamite at the city reservoir today.

ARE BURIED IN A CLIFF

Enthusiasts Hope to Find Bacon's Library.

Bolton, Mann, Nov. 19.—Following the minute directions of a cypher of Lord Bacon's writings, which the discoverer of the manuscript has cast doubt on the authenticity of Bacon's claim to the authorship of plays and historical works, a party of scholars, including a party of American scholars are now in England in search of the lost library. In this party are Dr. Orville Redenbacher, a noted American scholar; Dr. W. H. Present and John Daniel, Mrs. Present and Mrs. M. L. Daniel.

According to the following instructions of the cypher, the party are to go to England, and have found the secret of the location of the lost library. According to the cypher, leads directly to the river, and thence to the cliff, where the original manuscripts and books have been concealed from the world for 300 years.

The cave, took of tree, cliff and other landmarks, took of in the cypher were used to advise information, prove the party claims, the existence of the original manuscript and books, and doubling the truth of the assertions made by Bacon in the cypher in regard to the lost library.

It is thought that this will be an overturning of the history of England.

The party expects to find in Bacon's own writings in the original manuscript the key to the depths of the other claim to have established, that Elizabeth, the daughter of Henry VIII, was born before she was found in the Tower of London during the troublous times that antedated the birth of the Earl of Essex, who was the son of the Earl of Essex, and it is regarded as a sure winner.

It is almost a sure winner.

Dr. C. C. Crossley, a noted Englishman, is opposing McBride, is highly respected and commands a large conservative vote among the press.

According to the cypher, the cliff is the fight between Fisher and the Rock Conservative supporters are likely to win.

Wright, the Conservative candidate, is not respected.

He is also charged with manipulating the voters.

He is opposing McBride, is highly

respected and commands a large conser-

vative vote among the press.

It is regarded as a sure winner.

In the northwest Kestonay at Revelstoke, Linderman will defeat H. J. G. Wright, the Conservative.

He is supporting McBride.

SATURDAY, NOVEMBER 20, 1909.

SIX MILES OF NEW BUILDINGS.

Edmonton's building permits for the
past year total more than two
million dollars. The buildings include
461 residences, 39 stores, 4
churches, 1 convent, 4 hotels and
apartment houses, 3 factories, 2 engi-
neering, 3 power plants, 1 round-
house, 2 flour mills and machine shops,
87 stables, 20 warehouses, 235 addi-
tional units and alterations.

If the new buildings stood side by
side, each on a 50 ft. lot, they would
form a row 3 1/2 miles in length. Or, al-
lowing 2 lots each for schools, churches,
hotels, etc., the row would be more
than 6 miles in length. If they were
built on both sides of a single street,
we would have a street 3 miles long
solidly built up on each side in a
solid wall 10 feet thick, allowing for 30
streets of 10 feet width. This new
avenue would be more than 3 1/2 miles
in length.

A NEW TRUST LAW.

The Minister of Finance informed
the other day that the law creating
trusts would be amended at this ses-
sion. At present the law gives the
Government power to cause the duty
on any article, the price of which is
governed by judicial inquiry to have
been duly enhanced by combination.

What the nature of the amendment
will be the Minister did not indicate.
It might be a good plan to make the
examination automatic on the part
of the price-brokers. Manufacturers
would doubtless object that the ex-
amination would be too costly. But
the coal had been appraised and the
judgment upheld by the highest tri-
bunal in the country. There would be
some justice in the claim.

Or the intention may be to prevail
some means for starting investiga-
tions. At present an inquiry can
only be made by a committee of
parties undertaking conditions of
privilege and independence. But as
the exacts of a combine do not usually
hit an individual very heavily at a
time it is difficult to get action

Perhaps as good a plan as any
would be to create a commission on
lines similar to the Railway Commis-
sion, which would send auditors when
ever needed, would hear the com-
plaint without too much expense,
and whose decisions would be final.

Of the need of tightening the laws
there is no room for doubt. What
has not been the only laxity com-
mon in Canada during the past few months
is the fact that the coal has been
grown at such a rapid rate. This
growth of that mercantile com-
modity called the moneys.

The new smelter merger, George
an intent in point of size, is per-
fectly justified but has signified
a union in the same way as if
by marking up the prices builders are re-
quired to pay for this material. The
comers of the country have been
long and hard as having paid their
rents, board, wages and found-
out independent enterprises, and
the charge has never been denied so far
as known. A similar accusation has
been laid at the door of the manufac-
turers of timber, and of immovable
real estate.

Most of these charges are now
reputable papers, which claim to
speak with knowledge and which cer-
tainly speak with responsibility. Yet
the existence of such a union has not
been denied. It is to be hoped the pro-
posed amendment will make it easier

to prove those same facts.

Whether or not there are any

other essential points in the situation
is not as yet very clear. The
shortage has not as yet become
serious, but it is declared the supply
is hard to get to meet present demand,
and that to sell says supply
over a large section of the country
would result in more orders than can
be filled at all promptly.

The subject is one of very great con-
cern to Edmonton. The mines in this
vicinity seem to all be in the same
position as the miners in the
markets along the lines of the Can-
adian Northern and the G. T. P. As
readily as they do possess these markets
they can as easily lose them. The
coal when it is ready to deliver
the coal when it is wanted, and
when it is wanted in a manner way
which will satisfy demand for coal from
the eastern provinces will likely have the
effect of sending the local price up
again.

It is a somewhat remarkable con-
dition that though the whole eastern
slope of the Rocky Mountains and a large
portion of the western portion of the
country is underlain with coal, there
is a coal shortage anywhere in the
western country. Yet as early
as cold weather comes, a scarcity

of coal is a general feature.

There is no explanation for this
except that the coal is not being
mined in sufficient quantities.

It is a mystery which we will

never understand.

Then another thing, look at the situa-

tion of the Eastern States. Europe is

now getting along to get a big lot

of wheat from below the line, but it does

not seem to be able to get it.

Prices are high.

What is the reason?

Then another thing, look at the situa-

tion of the Western States.

MONTRÉAL SEES A FUTURE FOR THE WEST

DR. GRENFELL IS MARRIED
Lutheran Missionary Wins Chicago
Society Belle for Wife.

CHICAGO—Social and relig-
ious circles of not only this country,
but England as well, were interested
yesterday in the marriage of Anna
McLennan, daughter of Mrs.
Selina Burke McLennan of 2401
W. 111th Street, to Dr. James C.
Grenfell, the noted missionary in
Montreal. The ceremony was per-
formed at the First Lutheran church
by the Rev. O. M. Waters, follow-
ing the service a small circle
gathered around the bride in a reception at
the home of the bride.

The bride was a young, slim, made
woman, dressed in a white gown and
bonnet. Her hair was fastened with a cluster
of delicate flowers. Her maid of honor
was a slender, dark-haired girl who
wore a blue dress.

Dr. Grenfell is an international
missionary because of his missionary
work in China, Korea, Japan, and
Russia, and he has also been decorated
with the Order of the British Empire.

CONVENTION ANXIOUS
AS TO FATE OF LEADERS

Laborites Learn With Regret That There Is Some Doubt as to Granting of Appeals in the Case of Pres. Gompers, Vice-President Mc-Mitchell and Secretary Morrison.

Toronto, Nov. 19.—In a supplementary report submitted by the committee of resolution, the convention of the American Federation of Labor, held today, the following declaration, subsequently unanimously approved by the convention was made:

"That in the opinion of the speech we have exercised during the convention without sufficient restraint upon sufficient grounds, the ungranted authority, has been more in conformity with the fundamental principles of free and equalizing people, free speech, and the press than is possible at present in the United States."

Evidence that the proclaiming brought at this convention has been to the effect that President Gompers, Mitchell and Morrison, was also evidenced for the hundredth time in the speech of the president's report. In concluding its report this committee was made:

"Resolution of Report: We act with deepest regret why at this convention that there is some doubt as to whether the appeal for the grant of the right of self-government will be granted. We hope that the American Federation of Labor, in its position that we may know what the position of the final judicial tribunals will be."

It should be denied and Brother Gompers, Mitchell and Morrison be compelled to admit that the money placed upon them, that the salary be paid to each of them is a violation of the principles of the American Federation."

The salary of the president is \$4,000 per month, while the other two adopted unanimously by a rising vote. The electrical workers' controversy, which was adjourned, was finally settled when it adopted its recommendation of the law committee, that a committee be appointed to confer with the contending parties and President Gompers be appointed to arrange terms of settlement. The electrical workers' floor for a short time.

Old Age Pension Bill.

The committee recommended the endorsement of the "principles of old age pensions and the like" and the bill introduced by Senator Wilson, of the miners.

This will provide for the establishment of old age pensions for aged persons, men and women, who shall receive compensation from the government, but not from the military service under certain circumstances. For Canada, the committee recommended the system now in force in Great Britain.

The recommendations of the committee were adopted. The report of the committee in favor of the establishment of Lincoln's Birthday as a legal holiday in the United States was also adopted.

A resolution known as the socialist proposal, which was introduced by Friday, Frank, Hay and W. D. Vanhorn, of the United Mine Workers, was withdrawn by the committee, without reading to the convention, that the committee's suggestion was withdrawn in the interest of harmony and a united labor movement, so as to secure the support of the trade unions when the courts are assailing the rights claimed, by organized labor. The resolution to establish a national convention and the convention for 1910 are slated for tomorrow. Those will be followed by the election of the present officers of the federation. St. Louis will probably be selected for the meeting next year. The same sentiment in favor of Washington has shown itself during the present week. The convention will adjourn about noon tomorrow.

LIQUOR CASE CREATES STIR

Witness Paid to Take Holiday While Case Is On.

Calgary, Nov. 19.—William, attorney for the liquor police court, this afternoon agreed a stipulation that he had been asked to take a holiday while the case went to trial of Spacey Thompson, proprietor of the National Hotel, for four hours. Mr. Thompson, and his son, A. Kevin O'Brien whose connection with the case was not established by the defense, were charged with affray.

With the defense having agreed to a short holiday, the trial was adjourned on Tuesday on being informed that a shooting had taken place in the city.

The appeared yesterday on the court and admitted himself from court on Tuesday on being informed that a shooting had taken place in the city. He appeared yesterday on the court and admitted himself from court on Tuesday on being informed that a shooting had taken place in the city.

Investigation Telegraph Merger

New York, Nov. 19.—The United States government today began an investigation into the merger between the Western Union Telegraph Company and the American Telephone and Telegraph company with a view to dissolving the combination if found to violate the anti-monopoly law.

SHALL BRITAIN BE
GOVERNED BY LORDS

(Continued from Page One.)

feature of the representative government of the Empire. The papers have challenged the authority of the Commons, the knife must be drawn. The sword must be drawn. The chamber without heatation or mercy. I am would have had it otherwise, but the day of grace is at hand. Poor Balfe feels heavy upon him the shadow impending. How is his spirit? Marconi was one of the first and most reckless manifestations ever launched by a party leader on the eve of an election. It is hard to read between the lines of the long-winded oration the half-hearted misgivings of the speaker. His political policy is a fantastic will o' the wisp which evades examination. His sophistry which provokes a pitying smile. Never did a great statesman speak with such a lack of conviction or sound. Not by such weapons or by such a leader is this nation likely to upon the runs of a constitutional government.

Should Not Tax Cotton?

London, Nov. 19.—Surrounded on all sides by detection and weak from exhaustion, Andras Sandler, 19, believed to be one of the three bandits who held up the Bank of Nova Scotia, terminated a running duel of three hours with a revolver shot in the creek valley last evening by firing a bullet into his brain and died in the arms of his mother.

The killing of the speaker, whom we have exercised during the convention without sufficient restraint upon sufficient grounds, has been more in conformity with the fundamental principles of free and equalizing people, free speech, and the press than is possible at present in the United States.

Evidence that the proclaiming brought at this convention has been to the effect that the American Federation of Labor, Vice-President Gompers, and Secretary Morrison, was also evidenced for the hundredth time in the speech of the president's report. In concluding its report this committee was made:

"Resolution of Report: We act with deepest regret why at this convention that there is some doubt as to whether the appeal for the grant of the right of self-government will be granted. We hope that the American Federation of Labor, in its position that we may know what the position of the final judicial tribunals will be."

It should be denied and Brother Gompers, Mitchell and Morrison be compelled to admit that the money placed upon them, that the salary be paid to each of them is a violation of the principles of the American Federation."

The electrical workers' controversy, which was adjourned, was finally settled when it adopted its recommendation of the law committee, that a committee be appointed to confer with the contending parties and President Gompers be appointed to arrange terms of settlement. The electrical workers' floor for a short time.

Old Age Pension Bill.

The committee recommended the endorsement of the "principles of old age pensions and the like" and the bill introduced by Senator Wilson, of the miners.

This will provide for the establishment of old age pensions for aged persons, men and women, who shall receive compensation from the government, but not from the military service under certain circumstances. For Canada, the committee recommended the system now in force in Great Britain.

The recommendations of the committee were adopted. The report of the committee in favor of the establishment of Lincoln's Birthday as a legal holiday in the United States was also adopted.

KEEP WAR-SHIPS OFF LAKES.

Great Lakes Must not Become Mediterranean, Says Minneapolis Journal.

Minneapolis, Nov. 19.—The Minneapolis Journal tonight says editorially:

"Canada is within her rights, if she chooses to do so, to prohibit us from sending our ships to the Great Lakes. No minor irritation or inconvenience due to that convention should be permitted to make it unpopular."

The Great Lakes must not become a Mediterranean, says the Journal.

The Rush-Bagot convention that has neutralized the Great Lakes' importance to the United States, according to this report. No minor irritation or inconvenience due to that convention should be permitted to make it unpopular.

yesterday. By Sir Wilfrid Laurier and R. L. Borden. Consideration of Estimates.

DR. BARR, DUFFERIN, FOUND DEAD IN BED.

Ottawa, Nov. 20.—Dr. John Barr, M.P. for Dufferin, one of the best known Conservative members in the House of Commons, died suddenly yesterday morning in his room at the Hotel Cecil. He was 62 o'clock this afternoon. His death was attributed to a heart attack, but his last appearance occasioned no alarm. He had been in Ottawa all day yesterday morning, but his last appearance occasioned no alarm. He had been to the Club to have dinner his room was entered by Dr. Roche, of Marquette, who found him dead. He was strong, healthy, Conservative member, and he was found lying on his back, his head resting on the condition of the body, he had been dead since early morning. He had been in Ottawa recently in the best of health last night and had supper as usual.

Toronto, Nov. 20.—In the House of Commons made an early start today in the consideration of the estimates for the next fiscal year. A division of the members voted for the departments of agriculture, post works and labor before adjourning at 9:30 a.m. The total amount voted was \$1,320,088, which is a pretty good record for a first day on estimates.

Previous to going into the supply, Hon. G. E. Foster made a general statement concerning the financial position of the government, which he said were growing at such a rate as to be alarming. He said that the expenditure, if measured by the growth in trade and revenue would suggest that the country was in better shape than the period when the Conservatives were in power.

Wants More Information.

Hon. G. E. Foster made inquiry as to the possibility of getting more information in respect to the financial situation of the country. Sir Wilfrid Laurier that everything had been produced which the imperial authorities were willing to make public.

Hon. Sydney Fisher introduced the payment bill for 1917 with a speech in which he affect vaccination.

Hon. Geo. E. Foster introduced his bill to provide for taking over of the Canadian Lines. Sir W. R. subject to the approval of parliament. Both bills got a first reading. The other bills were referred to the committee of bills by private members.

Replies. Dr. Barr's Death.

Sir Wilfrid Laurier made a sympathetic speech in respect to Dr. Barr. He said that he had a friend with him on Thursday when the member for Dufferin was in the best of health and there was nothing to indicate other than that he looked normal. Dr. Barr was a man of great energy. Dr. Barr was very much respected by the members on the government side.

H. L. Borden said that on Thursday Dr. Barr had been chatting with several members of the government on the best of health and spirits. He described the late member as conscientious and upright in his public interests. E. N. Lewis (Con.) West Huron), moved a motion that the government should not be allowed to move to persons due to motor vehicles. He remarked that this bill was necessary owing to the fact that highway accidents were increasing rapidly. The changes which the criminal code was drafted were far too common, and suggested a special legislation to deal with them.

Bank Act An amendment.

Major Sharp's (Con.) North Dufferin bill to amend the Bank Act so as to provide that all stock on which no dividends have been claimed for upwards of six years may be sold by the bank to the government as trustees.

Hon. George E. Foster asked some questions concerning the financial conference the report of which was tabled on Wednesday. He wished to know what was done with the money sent to Zealand and Australia with regard to Imperial defence. The other day the government announced that what these countries were going to do and Mr. Foster suggested that the proposal would appear in the report.

However, this was not the case. And Mr. Foster said that there was a division in that the report to an effort by the admiralty to meet the wishes of the colonies. He asked what was done with the wishes of Canada were.

Would Give Information.

Sir Wilfrid Laurier replied that he planned to furnish Mr. Foster with a detailed statement of the delivery of the Imperial conference. He had no objection to furnishing Mr. Foster with a copy of the report of the general plan and afterwards a modification of the general plan, but the report itself.

Mr. Borden explained that not a memorandum had been prepared by the government.

Hon. Wilfrid Laurier stated that the government intended to bring down a bill regarding naval defense, if at all.

Mr. Fisher's Resolution.

Hon. Sydney Fisher introduced a resolution on which a bill will be based, providing for the prevention of the spread of insect pests and

diseases, destructive to crops on the hill in its scope will be similar to the act introduced some years ago, which has enabled us to put into effect the San Jose scale into Canada. The minister assured Mr. Martin Burns, E. Armstrong (Conservative), East Lancashire that the act in its present form did not clash with existing legislation.

Foster Discusses Expenditures.

At four o'clock yesterday, W. S. Fielding, the first time this session moved the House into supply, but Mr. Foster said he had a few remarks on the civil government before this motion passed. While Mr. Foster's substance was that the increase in the civil government expenditure, be made some general references to the expenditure on the civil govt.

Mr. Foster pointed out that where as the expenditure on the civil govt. was \$2,000,000 in 1916, it was \$2,100,000 in 1917, and that it had been \$1,600,000 when the Conservatives went into power, increased to only \$1,700,000. The increase in 1917 was between 1916 and 1918 a jump up to \$2,800,000, or over \$900,000 and on March 31, 1911, the House was asked to provide \$4,700,000.

The increase in 1917 was absolutely startling. Referring to the increase in the general estimates for 1917, Mr. Foster said that the figures were enough to set the people to work.

Mr. Fielding's Reply.

Hon. W. S. Fielding said that the expenditure of the country should be reduced to the minimum, and the revenue and revenue. When Mr. Foster was giving his figures, he said that during 1916 a period of stagnation was valid. The average revenue during that year was \$1,600,000. Total revenue during that time was \$1,300,000.

Mr. Fielding then informed the House that in 1917 the revenue had grown to be over \$1,600,000. It had fallen away a bit since then, but still remained above the 1916 level.

True there had been an increase in expenditure, but the Conservatives had not increased it nearly as much as the 1916 figure, when no headway was made by the country.

Mr. Fielding then noticed that when it came down to the details of expenditure the Opposition did not seem to be doing any less. The House then went into supply on the agriculture estimates.

Mr. Fielding said that for the coming census a temporary staff would have to be employed for a year or two, and the expense of employing them quite to be incurred because it only allows the employment of temporary clerks.

Seek Tariff Increases.

At the present session application will be made for a number of tariff increases. Among the application for an increase will be that of the Canadian iron and steel industry.

This will be applied for when the changes take place when an almost complete revision of tariff schedules in iron and steel follow in the commerce of the country.

Senate Adjourned.

On Friday, Nov. 19, the Senate today adjourned until Tuesday, when the insurance bill will come up for a second reading. The bill, which was referred to business being postponed to suit the Senators who wanted to go to Montreal, will be read again on Friday.

The changes in the bill since it was passed last session are unimportant. They are:

A previous permit the Phoenix Assurance Co. to do business with life and fire business has been struck out.

The British Office life table, 1901, has been substituted for the British Mortality mortality table of the Institute of Actuaries of Great Britain. Beyond these changes the only other change is the bringing into force of the measure in 1918 instead of 1916.

CARTIER—AND OTHERS.

Montreal Star—Yet these are not lacking here in the very heart of the province or Quebec. They are the most popular to see on a selfish basis for the ultimate consequences of their arguments, who are endeavoring to awaken among the French-Canadian body opposition and resentment to the policy of strengthening the Canadian Government.

The British Office life table, 1901, has been substituted for the British Mortality mortality table of the Institute of Actuaries of Great Britain. Beyond these changes the only other change is the bringing into force of the measure in 1918 instead of 1916.

EDSON—AND OTHERS.

De Colle's Statement.

De Colle says in his life that as General Edward Carter, To the last he was a member of the Canadian Parliament at Kingston and Canada were so closely intermingled and dependent on each other that it would be difficult to separate them. Yet the words and examples of such men as those seem to the friends of their liberty that they would gladly fire the first shot.

DOWAGER DUCHESS OF MANCHESTER IS DEAD

Was Favored Friend of King Edward Until She Disclosed State Secret Communicated to Her by the King at Biarritz—but the King For-gave Her.

London, Nov. 20.—Constance, Dowager Duchess of Manchester, died this morning of heart trouble at her London residence in Grosvenor Square. The end came quickly after a long illness. Her daughters were the two sisters of the Duchess, Miss Emily Yanga, of New York, and Mrs. Anna Kynaston, of London. At the bedside also was Sir Alfred Fripp, King Edward's own surgeon, who had been called in by the Duchess under express orders to remain with the Duchess until she recovered, or

King's Generosity.

The striking fact that the King of England, towering fortress with kindness and magnanimity, was more magnanimous shown than at the deathbed of the dying American lady, was the secret of her long life. Two years ago, Constance, the Duchess, at 80, had disclosed to King Edward a State secret in disclosing "private" what the King in his friendship told her, that his premier, Campbell-Bannerman, that his premier, Campbell-Bannerman, was about to resign and was summoned to Biarritz to form a new British cabinet.

King Edward admitted that she broke confidence with His Majesty and she never denied it. But the King forgave her, and nothing touching to the faux pas placed Edward in the position of having been diplomatically inferior to his predecessor in his conduct.

"No one will ever see my husband again," he said, "and Mrs. Von Bismarck, who is a woman of great light in complexion as most of the southern, and she says, the daughter of a Frenchman, a light-colored woman who has been an honored name in Louisiana."

ALLEGED CASE OF DUMPING

American Firm Secures Big Contract to Build Tin Cans in China.

London, Nov. 17.—The South Wales iron and steel manufacturers have been severely hit by the Americans in their market in Canada, and the continuing price war has suspended.

His fortune, however, is not yet lost.

He was deliberately received,

and it is believed that his wife was an astorion.

He was arrested under the law prohibiting the sale of negro drug.

He was released on bail.

He was then released on bail.
